CSA Core 4 | LT Elective | 6 CE Credits

Workshop Description

Techniques to use with a child who discloses abuse will be reviewed, with an emphasis on encouraging expression while not leading the child, and ways to avoid questions that may contaminate an investigation. Child protective service (CPS) reporting scenarios will be used for illustration. The roles of various entities in child sexual abuse will be delineated, including those of family members who face crises of their own. Parents who have experienced this trauma are included to help enhance the framework for healing. The unique intersystem coordination in Delaware County, PA allows us to bring together a panel from child welfare and the legal system for a lively and spirited discussion of the issues around investigation and prosecution.

This is the Core Knowledge Part 4 for the Child Sexual Abuse Treatment Certificate and applies as an elective to the Loss and Traumatic Stress Certificate.
